AMA calls for Patient Welfare to take Priority over the Interests of the Employer.

<http://www.ama-assn.org/amednews/2012/11/26/pr11126.htm>

This issue was recently addressed by HW USA in an issue of the American College of Surgeons 'Surgery News' where it was advocated that the primary fiduciary responsibility of the physician should always be to the patient.

<http://www.acssurgerynews.com/opinions/editorials/single-article/the-changing-role-of-the-physician/9dbaf6056dcb9a966c5beef8cb438de6.html>

Health Watch USA has been active on this issue. HW USA placed a comment to CMS regarding proposed ACO regulations which appear to place the ACO Governing Body's fiduciary responsibility to the ACO and not the patient.

A Hospital War Reflects a Bind for Doctors in the U.S. - NY Times

-- Integration Through Facility Fees, Production Quotas, Rising Medicare Costs.

"Many of the independent doctors complain that both hospitals, but especially St. Luke's, have too much power over every aspect of the medical pipeline, dictating which tests and procedures to perform, how much to charge and which patients to admit."

<http://www.nytimes.com/2012/12/01/business/a-hospital-war-reflects-a-tightening-bind-for-doctors-nationwide.html>

Health Care Costs Increasing As Hospitals Employ Physicians

<http://www.charlotteobserver.com/2012/12/17/3728676/as-doctors-flock-to-hospitals.html>

Antiseptic Products Can Become Contaminated With Bacteria.

A NEJM article by Chang and Furlong (2012) found that bacteria which are resistant to antiseptics can reside in the product and cause infections.

<http://www.nejm.org/doi/full/10.1056/NEJMp1212680>

"The reported outcomes range from localized infections at injection sites to systemic infections resulting in death. The reports implicate all commonly used antiseptic categories, including alcohol, iodophors, chlorhexidine gluconate, and quaternary ammonium products. Some potentially pathogenic organisms, such as *Bacillus cereus*, *Burkholderia cepacia*, *Pseudomonas aeruginosa*, and *Serratia marcescens*, have been implicated in more than one outbreak."

Hospital-Acquired Infections Associated With Higher Re-admission Rates
